

Damaka[®] Amadeo[™]

“any device.. any network.. any time.. any where..”

Amadeo is a secure and reliable mobile platform for your communication & collaboration needs

Today's lifestyle, both personal and workplace environment, demands a high degree of collaboration and mobility among people to achieve higher levels of efficiency and productivity. Amadeo facilitates a secure and reliable mobile platform to foster a truly feature rich Unified Communication & Collaboration (UCC) environment.

Damaka, a proven leader in managed peer to peer technology, has utilized its patented technologies in architecting a standards (SIP/RTP) based software UCC solution in Amadeo. Packed with rich features like multiparty audio and video conferencing, desktop and application sharing, Sweeping™, IM along with a host of other features. Amadeo is built to meet the demands of 'collaboration on the go™'.

Amadeo software client is a carrier grade product that operates seamlessly on any device across any network:

Devices: Android, iPhone, iPad, BlackBerry, Symbian, Windows Mobile, Windows Laptop/Desktop, Mac, Netbooks, Tablets

Networks: WiFi, 3G, 4G (WiMAX, LTE)

Amadeo client features are available in the following network architectures:

Managed Peer-to-Peer network
SIP Client-Server network
IMS network

Amadeo is designed and architected to enable communication and collaboration among devices for Service Providers, System Integrators, Enterprise, SMB, Healthcare Verticals; thus empowering the workforce away from the home office to stay connected with business activities as well as ensuring individuals to be plugged in on a continual basis.

Amadeo, a product from a company that leads innovative mobile video collaborative technology in the marketplace and is striving to keep the workforce stay connected.
