

# Damaka® Kalisto™

***Bring lifelike experience to meetings***

**Kalisto is an affordable HD conference solution that is bandwidth friendly**

Kalisto brings HD quality to video conferencing, provides a stage for conducting meetings from your desktop at a very competitive price point. Kalisto's High Definition video, projecting lifelike participant visual images across the table, makes you forget that you are in a virtual meeting.

**Kalisto supports mixing of HD, SD, LD quality video**

Kalisto's architecture is standards based and does not require a media server. It further includes flexibility by holding multi-party video conference among participants that have different device form factors. Kalisto can auto adjust video rendering depending on the resolution of the endpoint device specification and mix HD, SD and LD video sources to connect participants with any device – Smartphones, laptops, tablets, netbooks and desktops.

**Supports multiple end points Desktop, Smartphones, Tablets, Netbooks**

Kalisto can enable users to not only see lifelike images but also provide an environment to work collaboratively by sharing documents and applications. Kalisto is a bandwidth friendly solution with features that are simple to use and requires no training. Kalisto is capable of connecting to 3rd party standards based conference solutions.

Kalisto is an ultimate solution enabling '*being there*' experience from your desktop without an expensive infrastructure at an affordable price. Kalisto will lower the cost-per-user in video conferencing solution offering with superior quality for your organization.

Ideal for SOHO, SMB and Enterprise as well, Kalisto enables lifelike collaborative telepresence meetings anyplace, anywhere and at anytime. Easy to deploy and easy to use, Kalisto will help your organization reap the benefits of face-to-face meetings within minutes.

**Kalisto is an ideal product for organization of any type or size**

Kalisto. Reliable. Affordable. Simple. Robust. Scalable.

Kalisto is a product from a company that values the role of innovative technology in the marketplace.
